Detailed Description:

...device from a remote device.

Optionally the information link is, or is contained within, an SMS or MMS message received by the mobile telecommunications device.

Optionally prior to receiving the request ... content on the print medium.

Optionally the subscribed content is, or is contained within, an SMS, MMS or email message received by the mobile telecommunications device.

Optionally the subscribed content is... are loaded into an address book.

Optionally the information is, or is contained within, an SMS, MMS or email message received by the mobile telecommunications device.

Optionally the sensor module includes...stored remotely at a server.

Optionally the web page is, or is contained within, an SMS, IvilviS or email message received by the mobile telecommunications device.

Optionally the web page is... and stored remotely at a server.

Optionally the document is, or is contained within, an SMS, MMS or email message received by the mobile telecommunications device.

Optionally the document is at... telephone number included in the contact details.

Optionally the mobile telecommunications device automatically addresses a SMS, MMS or email using the contact details.

Optionally the contact details are received by the...user confirmation before automatically dialling the number.

Optionally the mobile telecommunications device automatically addresses a SMS, IvilviS or email using the number.

Optionally the number is received by the mobile telecommunications... an example Command form showing details of office printer field; Figure 58 illustrates an example SMS Based Downloadable Content Purchase; Figure 59 illustrates an example Netpage Play Sequence for Previewing a... illustrates an example High level sequence diagram for downloading to a mobile device, using a SMS alert to trigger the download; Figure 68 illustrates an example Sequence fragment showing the processing... 75 illustrates an example Business Card Web TJRL Field; Figure 76 illustrates example Business Card SMS and MMS Fields; Figure 77 illustrates an example Business Card Email Field; Figure 78 illustrates ...There are three messaging services in common use in the mobile networks at the moment: SMS (Short Message Service), EMS (Enhanced Message Service) and MMS (Multimedia Message Service). SMS is generally designed for sending text only messages up to 160 characters long. EMS is an enhanced version of SMS consisting of several SMS messages clustered together. This mechanism is used to deliver ring tones, etc to handsets. Both SMS and EMS are implemented using existing mechanisms in the GSM or CDMA networks and do... not able to self-transfer or "push" itself out to a handset, instead it uses SMS to alert the user to the fact that an MMS message is waiting in the... user to retrieve, so it requires a "push" and "pull" to retrieve the message, whereas SMS requires a

single "push" and EMS is delivered by multiple "pushes".

1.1 High Level... typically clicking on a link on a web page; or 2-the arrival of an SMS or MMS containing a M-Doc reference 507 or an M-Doc 500 itself.

A M... 517 is stored in the mobile network at a MMS Message Centre 518 and an SMS is sent to the device to alert the user an MMS 517 is waiting to... mechanism can be used to deliver an M-Doc 500 to a phone 100. The SMS notification can contain both an M-Doc reference 507 and an MMS notification. The request... desired sections out to them each day can be set up. The service could use: SMS, MMS or e-mail to "push" the M-Doc References out to the mobile device... clicking through an advertisement to the companies web site.

A company could "push" out via SMS, MMS or e-mail vouchers to members of their loyalty scheme or just to the... to a user who enters a competition or votes on-line. For example, using an SMS to vote on a reality TV show could result in an MMS being returned with... capable of playing various PlayRequests by utilizing the capabilities of the device. Examples include sending SMS objects, dialling phone number objects, etc. Due to the processing limitations of the device, a... dial", and is routed to the voice communications sub-system agent 568. If, however, the SMS creation application is running, then the PlayRequest is transformed by setting the operation to "set-destination-number", and it is routed to the running SMS creation application 569. Lastly, if instead the Contacts application is running, then the PlayRequest is... suitable protocol is used to push notifications to the Netpage Player, i.e. WAP push, SMS, etc. 2.7.3 Streaming Referring to Fig. 21, for certain media types, it is... to push a small notification to the device, notifying the player application (i.e. through SMS) to initiate a stream-based communication to the Netpage Server request (i.e. WSP) for... The traditional methods for purchasing and downloading such products are based around web browsing and SMS to initiate the download and EMS or MMS to deliver the product to the phone 100, see Fig. 58. The user enters and sends a product code via SMS at steps 720 and 721 to a vendor 723 who then delivers the product to... content like ringtones or phone themes, this provides a more convenient interface than the existing SMS interfaces in use today.

M-Print devices can provide a Netpage scan operation, and this... system is typically offered in a number of different ways, of which some are: 1. SMS/MIVIS-based services 2. Hosting of 3rd party applications and billing the traffic for those... to predict ahead of time the total cost of the transaction.

If we consider the SMS-based content download scenario, Fig. 58, there are three billing opportunities: 1. The SMS to initiate the transaction may be a billable SMS 2. The purchase of the content from the vendor 3. The delivery of the content via a SMS or MMS.

The first SMS is a standard SMS that the user may be billed for, it may be billed differently given that it is destined for a vendor who has a business relationship with the carrier. The second SMS/MMS is not billed to the sender, as would normally happen, but it is billed... the content from the vendor generates a billing record for the customer. As for the SMS case above, it is possible to arrange with a mobile vendor to accept these billing... billing records for the data traffic and the delivery of the content. As in the SMS case the delivery message is charged to the receiver rather than the sender, via an... generated by the ringtone vendor and would be handled in same way as for the SMS case above. It would be possible to have an agreement with the carrier whereby the...

Claims:

...as claimed in claim 3, wherein the information link is, or is contained within, an SMS or MMS message received by the mobile telecommunications device.

5. The method as claimed in...
